EXPERIENCE

Futurescape Technologies — *Software Developer*

MARCH 2023 - PRESENT | NAVI MUMBAI, MH

OneSociety (society Management Application)

- Created a library for form and table pages using RJSF (forms) and MUI DataGrid (tables) with Next.js.

- Reduced form page creation time to minutes with built-in validation and UI.

- Improved application scalability and maintainability through modular codebase design.

OneDashboard (SSO for interconnected apps)

- Developed an SSO dashboard with Supabase and Next.js for unified access to multiple apps.

- Implemented Role-Based Access Control (RBAC) for all sibling projects, enabling efficient user permissions management.

- Enhanced security and user management by integrating robust authentication mechanisms and ensuring seamless user experience across all interconnected apps.

Pinsout Innovations — *Software Developer*

AUGUST 2022 - MARCH 2023 | NOIDA, UP

Qollabb (online job portal)

- Solely responsible for backend development for all sections (employer, educator, mentor, and student) using Express.js and PostgreSQL with Sequelize.

- Developed the frontend for the employer section using React.

ConsultMyAstro (chat and call application for astrologers)

- Solely responsible for backend development.

- Implemented chat module with Socket.io, payment module, and wallet system.

- Contributed significantly to frontend development.
